StealthGenie - World's Most Powerful Cell Phone Spy Software

Find friends and share your location with Find My

Learn how to use the Find My app to share your location with friends and family members. You can even set up location-based notifications so you know if someone left a location or just got home.

The Find My app combines Find My iPhone and Find My Friends into a single app in the latest versions of iOS, iPadOS, and macOS. If you need help finding it, use Search on your iPhone, iPad, or iPod touch or use Spotlight on your Mac. You can also share locations on iCloud.com.

Share your location

When Share My Location is turned on, you can share your location with friends, family, and contacts from your iPhone, iPad, or iPod touch with Find My. You can also share your location in the Find People app on watchOS 6 or later with Apple Watch models that have GPS and cellular and are paired with your iPhone.

If you already set up Family Sharing and use Location Sharing, your family members automatically appear in Find My.

You can also share your location in Messages.

MANAGE LOCATION HISTORY

Creative Resistance

- Determining what’s happening
- Privacy settings, account security
- Keeping surveillance in place

Countering Surveillance

- Watching the watcher
- Use of panic buttons, shared location
- Crowd-sourced geographies of risk
- State surveillance

Journey

Plan your route

The Journey feature gives you the confidence to travel safely by allowing you to set your start and end destinations before setting off. This feature will notify your emergency contacts once you arrive safely at your chosen destination. An alert will be automatically triggered if you do not arrive at your destination within the time parameters you have set.

Every 5 seconds the platform will update your precise location based on your speed and movement activity to identify where you are once an alert has been raised.
